

Workshop Agenda Discussion/Suggested Resources/Message:

Tony C.:

I believe we should explain the Iowa Department of Natural Resources Hierarchy regarding Solid Waste Management.

- 1) Volume reduction at the source
- 2) Recycling, Composting and Reuse
- 3) Other approved techniques of solid waste management including, but not limited to,
Combustion with energy recovery,
Combustion for waste disposal, and
Lastly Disposal in sanitary landfills

Scott S.:

Donovan really wants to be involved if his schedule will permit him to do so.

I would be willing to work on the following topics:

Welcome

Q&A

Component examples

Shelly C.:

As I mentioned, I would like to help with logistics - keeping the meeting green and reducing our carbon footprint. I would also be willing to assist in any other areas as needed and am opened to being assigned to areas that are not covered.

We must present a cohesive message as we move forward with the workshop and additional educational and marketing initiatives.

Sara B.:

Will speak on: "Solid waste Environmental Management System" and/or "Solid Waste EMS and Comp Planning."

Possible table top displays – some of which are examples of efforts, not necessarily technical resources. (beyond typical landfill/recycle approach):

Al Bonini's group (water)

Conservation Boards/NRCS– formerly ASCS and SCS offices (water, soil)

KIB (illegal dumping/littering)

DNR Air Quality (air/open burning)

LMOP?? (LF gas)

Others with a greenhouse gas perspective –

Something from the multi-organizational effort in Boone County

MWA's EMS effort

Energy audits – MidAmerican, RECs, etc.

Weatherization – state program?

MWA's RCC facility (actually this was in reaction to the idea of switching houses over to compact fluorescent lights, which have their own set of recovery issues)

Iowa office of energy independence?

Stay away from bringing in & out vendors – e.g., ESI, Midwest Electronics, etc.– because the intent is to spark ideas rather than sell services. But maybe we have should have those folks there or at a minimum, lists of companies and permitted facilities to also provide as a handout.
